

# Assembly Instruction for 3D Backdrops

## EZ Tube Frame Assembly

### Assemble Elastic-Cord Tubes

- Align the ends of the tubes.
- Insert them until the snap-in button clicks securely into place.

### Connect Numbered Tubes

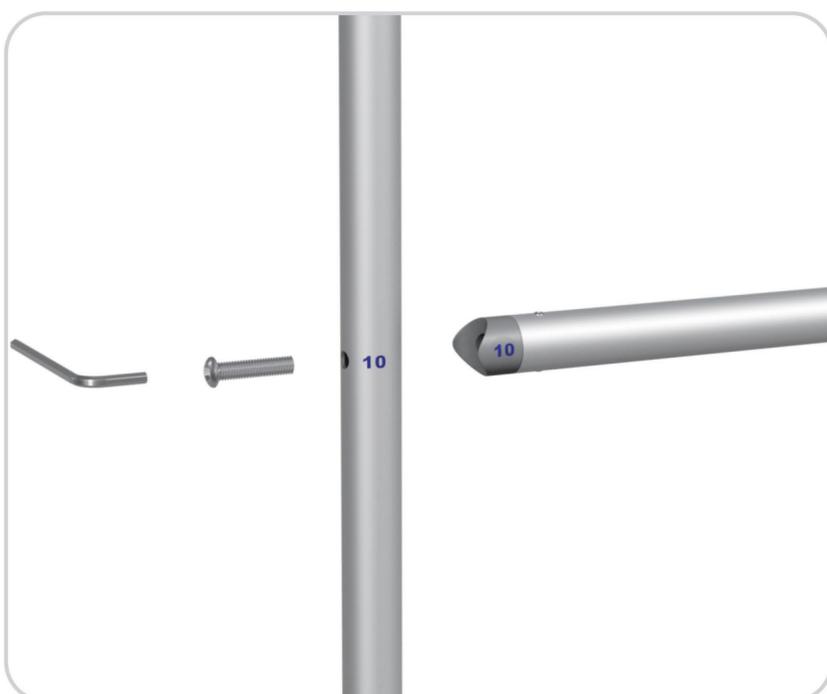

- Match the numbers (e.g., 1 to 1, 2 to 2).
- Push each tube in until the snap-in button locks into place.

### Install Support Poles

Support poles are also labeled with numbers and provide extra stability to the frame.

- First, unscrew the bolt from the end of the support pole with provided wrench.
- Align the pole with its mounting hole on the frame.
- Insert the bolt through the hole and screw it back into the pole to fasten it securely.

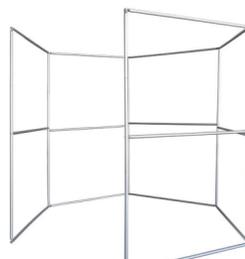

- ✓ Follow the EZ Tube Frame assembly guide above to complete the installation of all the structures listed below.

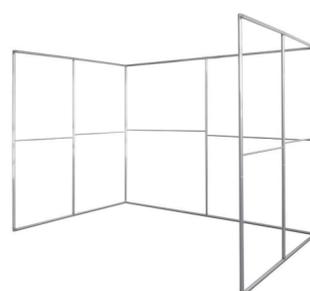

Oval C Photo Booth Enclosure

360 Spiral Photo Booth Enclosure

Hexagonal Vogue Booth Enclosure

U Shaped Backdrop

## Graphic Installation

### Install the Graphic on the Frame Structure

Slide the graphic over the top of the frame structure.

### Cover the Frame

Once the fabric graphic is fully covering the frame, smooth it out evenly. Zip it up along the edge to secure the cover in place.

The same installation instructions apply to the following products.
